

Job Description: Implementation Architect

About Vision

Vision Government Solutions is a leading government technology firm providing cutting-edge software to the public sector. We are at an incredible inflection point of growth. We are looking for exceptional individuals to join our Software Implementation team to help us successfully welcome new communities to the Vision family.

Our software implementation philosophy equally emphasizes the importance of customer delight, speed, and long-term partnership. To that end, we are searching for ambitious, motivated, detail-oriented individuals looking to further a career in Software Implementation. The right candidate will be driven by customer happiness, be obsessed with their to-do list, and have ample analytical chops to understand complex processes.

Summary of Role & Responsibilities

The Implementation Architect will primarily be responsible for data mapping, data mining, and business and data analysis while also building automated valuation models. Sample projects include:

Efficiently and effectively performing analytics and testing for multiple simultaneous software implementation projects

- Crafting custom data mapping & valuation models for assigned Vision CAMA implementations, including designing creative system configurations, table setup, cost, income, and regression modeling, statistical analysis, and advanced valuation consulting services
- Draft specifications for unique project components, including imports, exports, and custom reports
- Create custom client dashboards using PowerBI
- Conduct beta conversion validation and client-facing review sessions
- Develop automated conversion validation routines and standardize validation reports
- Synchronize project team members with customer expectations for optimal client deliveries
- Employ agile methodologies to achieve industry-leading project delivery schedules while maintaining ongoing customer engagement and excitement
- Jump in to help the team, and the company succeed whenever possible; there is no shortage of opportunities, and we thrive on team flexibility
- Consulting with the Product team to define critical Vision CAMA product enhancements and gaps for new state entry

Who We Are Looking For

The ideal person for this role will have demonstrated the following abilities and traits:

- **Skills and Ambitions:**
 - Ability to thrive in a fast-paced, ever-changing landscape
 - A natural curiosity and proclivity to derive patterns from chaos
 - Desire to work in a dynamic team environment with stellar communication and trust
 - A passion for data, whether in a proper RDBMS format, Access, or Excel
 - Keen problem-solving skills
 - Exceptional time management capabilities; deadlines are not flexible
 - Talent to communicate and translate ideas between technical and non-technical parties
 - Comfort with MS Office, PowerBI, and web-based project management tools
 - Open to occasional travel
 - Eagerness to leverage a host of analytical skills while facing challenges head-on

- Structured Query Language skills
 - Disdain for the statement, “it’s not in my job description.”
 - Skilled in SQL, R, Python, MS Office, PowerBI, etc
 - Real estate assessment industry experience
- **An obsession with customer happiness and loyalty:**
 - Deep commitment to long-term customer happiness
 - Strong preference for a partnership approach to customer management vs. a transactional approach
 - Commitment to promising what we can deliver and delivering what we promise
 - Interest in balancing new customer growth with setting realistic expectations
 - Willingness to span departmental boundaries to enhance the customer experience
 - The aspiration to invest in their team and customers
 - Refusal to settle for the status quo
 - A willingness to think creatively about the future of the assessment industry to set Vision apart from other CAMA vendors
